Certifications

ISC2 Certified in Cybersecurity (CC)

Cisco Networking Academy – Networking Basics

Achievements

TryHackMe (Devil.Kenam) – Top 4% Global
80+ rooms: SOC L1, SecEng, NetSec, PreSec, Jr PenTest

Languages

Mongolian: Native
English: B2+ / Working
Polish: Basic

Technical Skills

DFIR & Detection
CAPEv2 triage, log/artifact review, IOC extraction, ELK Stack, Snort IDS, Nessus, YARA

Systems & Network
Linux admin, Windows Event Logs, TCP/IP, DNS, TLS/SSL, PCAP, Bash, Git, Jira

Scripting & Cloud
Python, Pandas, FastAPI, PostgreSQL, AWS, GCP, OCI, Docker, Terraform, Ansible, CI/CD

Professional Summary

Cybersecurity graduate with security-engineering internship experience in vulnerability-report automation, Linux administration, and Bash monitoring. Hands-on projects span malware triage with CAPEv2, SIEM and IDS monitoring with ELK/Snort, and cloud-security automation. Combines investigation fundamentals with Python scripting and repeatable infrastructure workflows; targeting junior SOC, DFIR, malware-analysis, detection, or security-automation roles.

Education

B.Sc. Computer Science (Cybersecurity)
University of Economics and Human Sciences (Vizja), Warsaw Sep 2026

Experience

Security Engineer Intern
Khan Bank, Ulaanbaatar, Mongolia *Aug 2025 – Nov 2025*

- Processed Nessus vulnerability-scan CSV exports with **Python, Pandas, and Excel** to standardize findings and reduce repetitive manual reporting work.
- Maintained **Linux systems**, troubleshot operational issues, and wrote **Bash scripts** for monitoring and log rotation.
- Reviewed logs, documented findings, and collaborated with security and DevOps colleagues using **Git, Jira, Agile workflows**, and code reviews.

Selected Projects

Autonomous Cloud Governance (BSc Thesis)
OCI | Terraform | OCI Functions | LLM-assisted triage

- Explored event-driven cloud configuration triage and remediation aligned with **CIS benchmark** governance, combining cloud automation with threat-intelligence enrichment and LLM-assisted risk assessment.

WannaCry Dynamic Analysis
CAPEv2 | Malware behavior | IOCs

- Analyzed sandbox output from an isolated malware-analysis lab, reviewing process behavior and filesystem/registry artifacts and documenting indicators and investigation findings.

ELK + Snort Security Monitoring Lab
ELK Stack | Snort IDS | Log analysis

- Built a lab for log aggregation and network intrusion-detection visibility, practicing alert review, event correlation, and investigation workflows.

IAM API V2
FastAPI | JWT | RBAC | AWS | Terraform | Docker

- Built an identity-management API project with authentication and **role-based access control (RBAC)**, and explored infrastructure provisioning and deployment automation with CI/CD and TLS.
